Summary

Results-driven Software Developer graduating May 2026 with hands-on expertise in Kotlin, Android (Jetpack Compose), Java, and full-stack web development (Node.js, React, MongoDB). Built and deployed Firebase-integrated Android applications during a VTU-recognised internship, earning an Excellent performance rating. Experienced with REST APIs, Google Cloud Platform, and Generative AI tools. Seeking a Software Developer / Android Developer role where I can contribute immediately and grow within an agile team.

Education

Bachelors of Engineering in Computer Science,

The Oxford College Of Engineering
11/2022 – 05/2026 | Bangalore, India
CGPA – 7.95/10.0

Certifications

- [Android App Development Using Gen AI](#)
- [AI Tools Workshop Be 10X](#)
- [Certificate in Java Development Internship \(Octanet\)](#)

Professional Experience

Android App Development Intern, MindMatrix (CL Infotech Pvt. Ltd.)

02/2026 – 05/2026 | Bangalore, India

- Completed a VTU-recognized internship in Android App Development using Generative AI.
- Developed Android applications using Kotlin and Jetpack Compose.
- Worked with Android Studio, Google Cloud Labs, and Google AI Studio for GenAI-powered application development.
- Designed and implemented UI/UX features, application prototypes, and functional modules.
- Integrated Firebase services and participated in testing, debugging, and application optimization.
- Followed industry-standard Android development workflows and project-based learning practices.
- Achieved an **Excellent** performance rating during the internship evaluation.

Projects

Gram Waste Tracker

- Engineered a real-time Android application in Kotlin and Jetpack Compose that enables 3 distinct user roles (residents, admin, tractor drivers) to report, assign, track, and close waste collection tickets end-to-end.
- Integrated Firebase Realtime Database, Firebase Cloud Messaging (push alerts), and Google Maps SDK to deliver live GPS tracking of garbage vehicles and photo-based blackspot reporting with sub-2-second notification latency.
- Designed role-based dashboards for 3 user types, reducing manual coordination overhead and enabling real-time status updates across the waste management workflow.

Medi-Fusion | Full-Stack Blockchain Healthcare Platform

- **Backend & Blockchain Architecture:** Engineered a secure server using **Node.js** and **Express.js** to bridge blockchain and traditional database layers. Deployed a **Solidity** smart contract (MedicalRecord.sol) to guarantee the immutability, security, and tamper-proof storage of sensitive patient medical data.
- **Database & Role-Based Management:** Architected a relational schema in **MySQL** (hospital_db.sql) to efficiently track role-based metadata, separating permissions seamlessly for Patient, Doctor, and Hospital user tiers.

Technical Skills

Programming Languages

Java, C , Kotlin, JavaScript, C,SQL

Web Technologies

HTML5, CSS3, React.js, Node.js, REST APIs

Mobile Development

Android Development, Jetpack Compose, Android Studio, Firebase

Databases

MongoDB, MySQL

Cloud & AI Tools

Google Cloud Platform (GCP), Google AI Studio, Generative AI

Developer Tools

Git, GitHub, VS Code, Android Studio

Core Computer Science

Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks

Soft Skills

Problem Solving, Team Collaboration, Communication, Time Management, Adaptability

Languages

Kannada, English, Telugu, Tamil

- **Feature Integration:** Built asynchronous portals facilitating digital appointment booking, real-time prescription additions, and historical medical record tracking. Integrated **OCR capabilities** (ocr_result.html) to dynamically parse text from uploaded physical medical documents, streamlining administrative tasks.
- **Frontend Design:** Developed a responsive frontend using clean HTML/JavaScript dashboards optimized for distinct user workflows across hospital, doctor, and patient modules.

Ashram Donation Management System

- Developed a full-stack web application using Node.js, Express.js, and MongoDB to digitise donation management for an ashram, supporting secure donor registration, record storage, and reporting features.
- Implemented RESTful API endpoints and session-based authentication, enabling secure CRUD operations on donor records and reducing manual data entry errors.

Workshops & Events

SecurityBoat Community, Meetup Participant

01/2025 | Bengaluru

- Attended SecurityBoat Community Meetup 2026 in Bengaluru.
- Participated in sessions on AI Security, Privacy, Trust & Accountability.
- Engaged with cybersecurity professionals, researchers, and industry leaders.
- Gained insights into DPDPA, GDPR compliance, and modern security practices.

Interests
